

Toronto Plastic Shopping Bag Ban

Total City Results

EXECUTIVE SUMMARY

Key Points

- * Support for a reversal on the plastic bag ban is high in Toronto with 65% agreement.
- * The most important reason for reversal is the desire to have the option of using the 3 R's instead of an outright ban.

Details

- * Residents of Toronto were evenly split between agreement (47%) and disagreement (49%) with the plastic shopping bag ban prior to understanding any facts about the impact of the decision other than what City Council had approved.
- * After understanding some key facts about the impact of the ban relating to socio, economic and environmental factors, 65 % of Ward constituents agreed the ban should be reversed by City Council. A significant increase!
- * The freedom to choose plastic shopping bags as a convenient and no cost option to carryout purchases when shopping was extremely to very important with 44% of Toronto residents.
- * Managing household waste with the option of reusing plastic shopping bags as opposed to purchasing heavier plastic bags was extremely to very important with 56% of Toronto residents.
- * Given 90% of plastic shopping bags are made in Ontario, 47% are extremely or very concerned that the ban will result in job losses and closure of local small family owned plastic bag manufacturing businesses.
- * Given that plastic shopping bags in Toronto make up less than 1% of liter or waste in landfill, 61% say it is extremely to very important to have the option to reduce, reuse and recycle plastic shopping bags as opposed to banning them.

METHODOLOGY

- * Interactive Touch Response (ITR) poll conducted on September 20,2012.
- * Initial 157,570 residential phone database was used. Total of 51,303 dials - acceptance of live answer calls only.
- * 10 question poll including age category, gender, ban and ban reversal, 4 additional plastic bag factors to consider, councillor (selected Wards) and mayor favourability.
- * If under 18 further questions were terminated.
- * Total sample size of 5,019 on first question on ban agreement/disagreement - Accuracy +/- 1.4% 19 times out of 20.
- * Results weighted based on Ward population in 2006 Census of Canada and age, gender and voter turnout profile.
